Nursing resumes are slightly different from every other resume that you would send out. Being that nursing is a specialized profession, you need to remember a few things when putting together your first resume

What to Include in Nursing Resumes

Nursing resumes are slightly different from every other resume that you would send out. Being that nursing is a specialized profession, you need to remember a few things when putting together your first resume. Nursing resumes can be difficult to write because they will not include the same information as a standard resume trying to secure an office position. Read through the tips below before you start sending out your resume to potential employers.

First off, remember that nursing resumes will not include all past work experience. When applying for an office job, you usually show all of your past work experience, no matter how irrelevant it may sound. But remember that nursing is a specialized profession. You want to make sure that you put down your experience relative to nursing and downplay the rest of your work experience. This is not to say that you cannot include other work experience on nursing resumes, just be sure to not let those jobs overshadow your nursing experience.

Remember to include all nursing related experience on your resume. Anything that pertains to nursing, or caring for people should be highlighted on your resume so that it stands head and shoulders above the rest. This can include any volunteer work that you may have completed, or any nursing work that you did while in college. Nursing resumes often include information about the rotations that you did while completing your degree. This shows that you have experience in the field and are capable of working full time.

Nursing resumes should always include your educational achievements as well. Be proud of what you accomplished. If you were elected into the National Honors Society for nursing majors be sure to include this information. If you had a high GPA, include that also.

Nursing resumes may be difficult to write, but if you follow the tips above you will be able to put together an intriguing package for hiring managers. Sample nursing resumes can also be found on numerous online sites.
